About the AssetOwl business:

AssetOwl is an innovative technology with an enterprise software application, providing real estate owners with one trusted platform for managing their properties remotely.

Combining Geospatial Information Systems (GIS) and Virtual Reality (VR) technologies, AssetOwl has developed an Internal Visualisation System (IVS) as a powerful tool designed specifically for property owners and managers to visualise, question, analyse and interpret data within the four walls of each location and collectively across all locations with their network.

AssetOwl's Internal Visualisation System (IVS) software helps clients and their partners answer questions and solve problems by looking at their data in a way that is quickly understood and easily shared — on a property floor plan 'experienced' through a virtual tour.

AssetOwl empowers clients to improve project efficiency, productivity and accountability, while lowering the cost and risks in delivering projects and change initiatives of all sizes by providing one platform and one source of the truth for all property network information.
